上一讲，我们学习了 Schema，今天，我们来学习 Concepts。Concepts 是 Schema 的一部分，用于对一个 Schema 进行更细粒度的约束。Concepts 一个最基本的作用是为 Schema 的 Entity 和 Relationship 进行分类。

一个例子

假设有一个 Schema，Entity 有 Person 和 Company 两种类型，Relationship 有 Employee 和 Customer 两种类型。

```
Person
Company
Employee(Person, Company)
Customer(Company, Company)
```

现在，我们要对 Employee 的 Company 进行限制，只允许 Employee 的 Company 是 Company 类型的，Customer 的 Company 是 Company 类型的。

```
Person
Company
Employee(Person, Company)
Customer(Company, Company)
Employee.Company: Company
Customer.Company: Company
```

Concepts 语法

对于 Entity，Relationship，Attribute 来说，Concepts 的语法是一样的：

```
Concept_name: Concept_1, Concept_2, ...
```

Concept_name 是 Concept 的名字，Concept_1，Concept_2 是 Concept 的父类。

Concept 的名字可以是一个简单的名字，也可以是一个复杂的名字。复杂的名字可以是 Entity，Relationship，Attribute 的名字，也可以是 Entity.Attribute 这样的复杂名字。

Concept 的父类可以是一个简单的名字，也可以是一个复杂的名字。复杂的名字可以是 Entity，Relationship，Attribute 的名字，也可以是 Entity.Attribute 这样的复杂名字。

内置 Concepts

Concepts 可以分为内置的 Concepts 和自定义的 Concepts。

内置的 Concepts 有：

- Input Number
- Input Text
- Input Selection
- Input Boolean
- Input Date
- Input Time
- Input Datetime
- Input Duration
- Input Geo
- Input Image
- Input Video
- Input Audio
- Input Email
- Input Phone
- Input Address
- Input Id
- Input Text Long
- Input Text Rich
- Input Text Markdown
- Input Text Code
- Input Text Machine Data
- Input Text Machine Data Line
- Input Text Machine Data Block
- Input Text Machine Data Stream
- Input Text Machine Data Stream Line
- Input Text Machine Data Stream Block
- Input Text Machine Data Stream Line Block
- Input Text Machine Data Stream Line Block Line
- Input Text Machine Data Stream Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block
- Input Text Machine Data Stream Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line Block Line
